ARWEI®
Clean Ideas With System

ARWEI - simply better than the others.

Since several decades ARWEI-Reinstreifer are developed according to highest quality standards and are now available in two different quality types:

- **Premium-Reinstreifer Portal** with optimized technology, very hard-wearing ARWEI-special needle felt cleaning pads for the professional high-end use.
- **Compact-Reinstreifer Portal** a universal initial quality type for many ranges of use and a good price/performance ratio with rips as cleaning pad.

Both quality types differ in the texitle cleaning pad - apart from that they are identically constructed.

Our customers know why ARWEI is better. ARWEI Reinstreifer supply advantages of which other ones only can dream. Many years of product development pays off and results in satisfied customers.
Be convinced.

ARWEI - the practical modular construction system

ARWEI Reinstreifer in functional plug-in system. This way they can be adjusted very quickly to constructional conditions and if necessary can be repaired. Also an upgrade from Compact to Premium is possible.

ARWEI - the specialist for special shapes

ARWEI Reinstreifer are produced in all sizes, colours and shapes.
The unique ARWEI connector is unlimited in the manufacturing of special shapes.

ARWEI - the rational one

Similar to emptying the waste basket also the mat bed needs to be cleaned from time to time.
Therefor the Reinstreifer is rolled up and the mat bed is cleaned. The ARWEI Reinstreifer is very easy to roll up and all can be cleaned by a single person.

ARWEI – the smart one

ARWEI Reinstreifer are rear-ventilated and undermined by water from a height of 22 mm on. People walking from outside into a building bring moisture in. Only underneath the ARWEI Reinstreifer air is circulating under the cleaning bars and has the effect of an odorless drying.

ARWEI – the dirt collector

Beginning with a height of 22 mm ARWEI Reinstreifer have the biggest dirt absorption volume in each class.

Additional advantage Premium-Reinstreifer Portal:

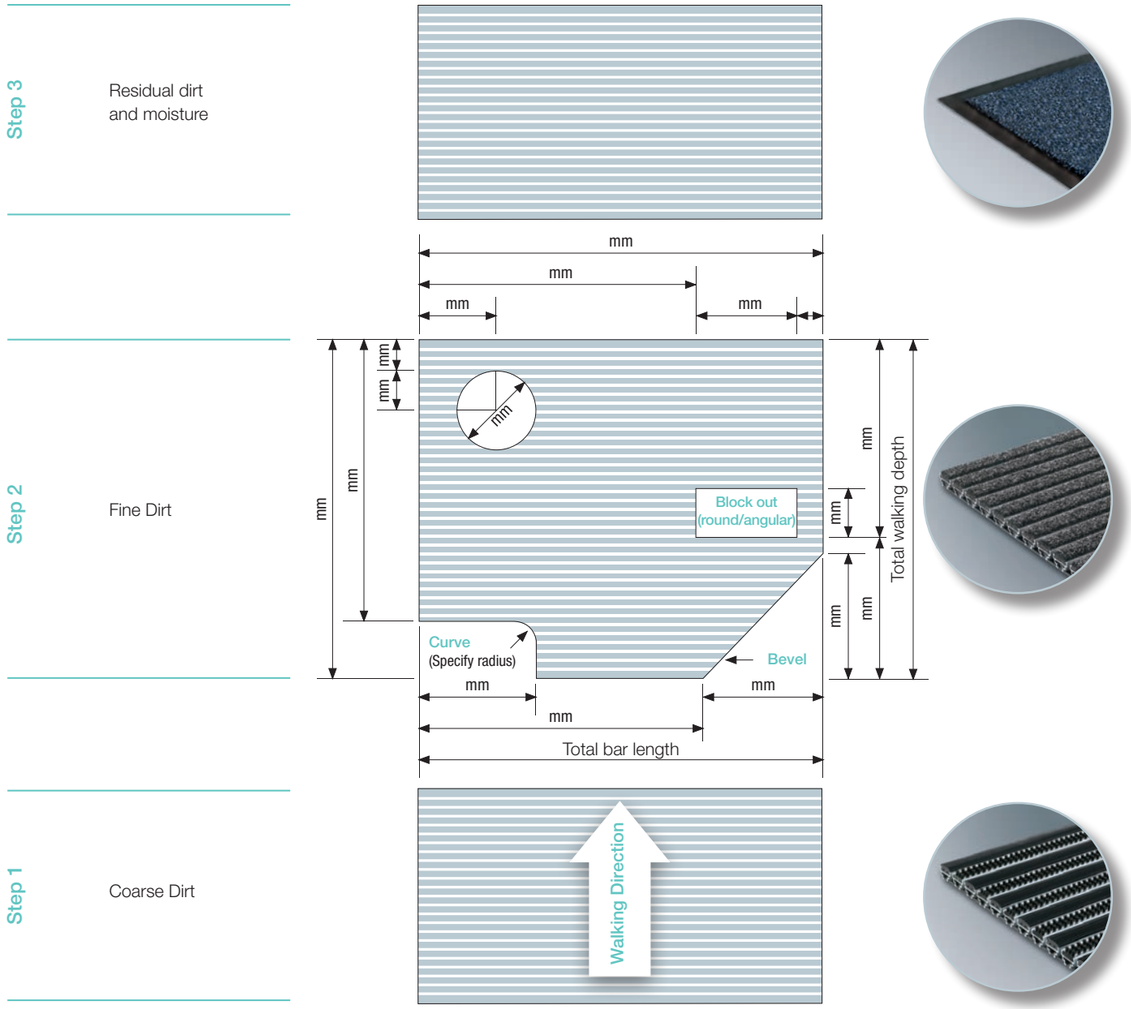
PREMIUM

ARWEI - the star

ARWEI Reinstreifer are the most aesthetic Reinstreifer on the market, especially after a longer period.

ARWEI - the resilient one

The special needle felt by ARWEI is rot proof, weather-resistant and extremely sturdy.
The very high wear layer is resistant even against most extreme strain and therefor has duplicated life time versus conventional sling ware.



Special Shapes
ARWEI-Premium-Reinstreifer can be manufactured in almost all shapes. Notches, bevels or bends are no problem.
Please add a scale sketch for receiving price information.

Indicated dimensions
Please always state the outer measurement for a delivery with frame and we produce the mat fitting accordingly. For deliveries with existing angle frames, please state the inner frame dimension without tolerance; we will consider the laying tolerance.

Please inform us if the stated measurement is a prefabricated dimension, so that we do not consider any laying tolerance.

Cleaning in three steps
Depending on the building and the frequency in the entrance area three cleaning steps have proved themselves in order to save daily cleaning costs. In the **first step** mainly the coarse dirt, in the **second step** the fine dirt and in **step three** remaining dirt and moisture is wiped off from the sole of the shoe.

Order today our ARWEI-Sauberlauf product overview.
www.arwei.de/info

*) All prices are in EURO plus VAT and freight costs, unless otherwise agreed. Packaging made of paper or foil are free of charge. Required wooden cases or special packaging will be charged. At a value of less than 100 EUR an extra charge for small quantities of 19,50 EUR will be charged. The weight table contains theoretically calculated values without packaging. ARWEI-Premium-Reinstreifer are available as a special form, for example, with bevels, arches, recesses or as a circle. Logos can be incorporated on the top layer. Please ask for additional costs in this case.
